Welcome to Greiner Bio-One Preanalytics

Your partner for innovative preanalytical specimen collection systems and safety solutions

There are more than seven billion people on the earth today. As different as they all may be, they share one desire; the desire for a long, healthy and safe life.

We know that we can make a significant contribution towards safety and health in the area of medicine. We use our ideas and our competence for new product solutions. This is our contribution to increased efficiency and safety in preanalytics, which in turn has a positive effect on the reliability of analysis results.

As technological leader in the field of sample collection using products made out of plastic, Greiner Bio-One provides custom-made solutions conforming to the highest of quality standards. The **VACUETTE®** product line, manufactured by Greiner Bio-One and sold in more than 100 countries throughout the world, is used in hospitals, laboratories, doctors' offices and blood donor centres. We are a global player because medicine knows no bounds.

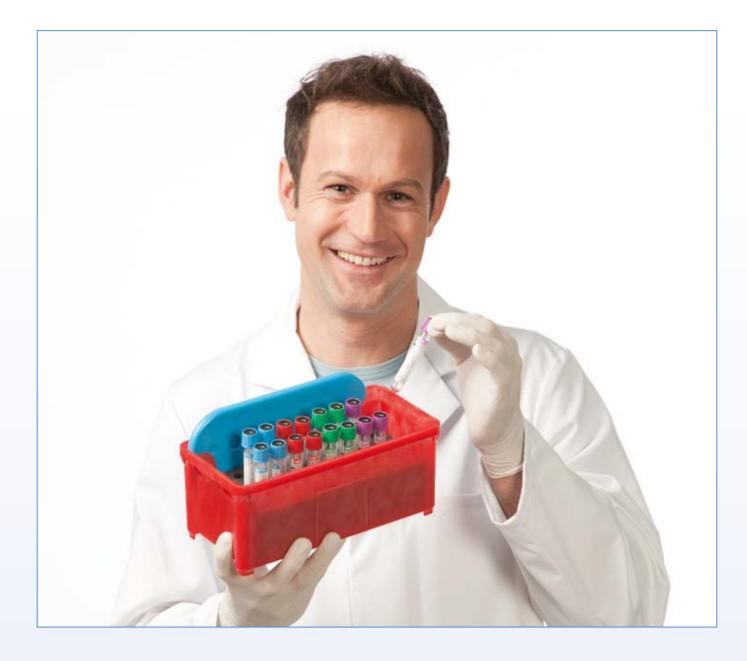

When dangerous infectious diseases occur due to changing living conditions, they make the headlines and the importance of our work is highlighted; since one of the most fundamental human needs has always been to maintain vitality and joy for life, it has always been our high priority.

Greiner Bio-One Your Power for Health

VACUETTE® one step ahead

VACUETTE OFFICIAL PROPERTY OF THE PROPERTY OF

Reasons why you should not be satisfied with other solutions, when you can have the ORIGINAL:

- Secause your work is an important service to people entrusted to your care.
- Secause correct analysis results are the basis for far-reaching decisions.
- Because only fully perfected products can guarantee safety and continuous high quality.
- Secause more efficiency lessens your burden with routine procedures.

Provide safety

Due to technical advances in the mid-eighties, Greiner was able to be the first company in the world to successfully launch a blood collection system made out of virtually unbreakable PET plastic including a safety cap. Against the background of the worldwide increase in infectious diseases such as HIV and hepatitis, health protection of medical staff has become a theme rapidly increasing in importance. The **VACUETTE®** Blood Collection System is a trend-setter. Many components of the **VACUETTE®** system have often been copied unsuccessfully, never reaching our high standards of quality.

Provide support

VACUETTE® products are the result of planned research and development in close co-operation with our partners and customers. Greiner Bio-One offers comprehensive additional services all around the product by providing expert support as well as technical support and training when a hospital or laboratory converts to the **VACUETTE®** Blood Collection System. A further specific focus of the company is the continuity of customer care, achieved by employing well-trained experienced sales representatives. Well-prepared support and education materials make the daily work with **VACUETTE®** products simple and safe.

Streamlining of procedures on the ward and in the laboratory is a theme that continues to increase in importance. **VACUETTE®** products can help save time for routine activities. Whether with the aid of high capacity instruments for decapping blood collection tubes or pre-barcoded blood collection tubes, Greiner Bio-One is investing in new product solutions that can significantly increase efficiency.

Innovation is the basis of all progress. The company history of Greiner Bio-One Preanalytics began with a ground-breaking innovation and this is still the central element of all company activities. In order to guarantee that the level of quality remains constantly high, products must be technically perfect and subject to continual improvements. Expertise in production technology makes it possible to manufacture special thick-walled evacuated tubes, distinguished by increased shelf life.

Greiner Bio-One is the specialist when it comes to realising customers' individual requirements. There are no long lead times, decisions are made quickly, and delays avoided when it comes to handling the orders. Greiner Bio-One Preanalytics is specialised in the manufacture of user-friendly, safe specimen collection systems. This focus means that the customer can be sure of getting products to the best possible cost-performance ratio.

The **VACUETTE®** System

Functionality for simple handling

The main advantage of a user-friendly evacuated specimen collection system with pre-measured vacuum is that a clearly defined quantity of blood, urine or saliva can be collected without further handling requirements.

VACUETTE® tubes can be changed quickly and hygienically, without any risk of coming into contact with specimen material. By using **VACUETTE®** Safety Products, a needlestick injury can be effectively prevented.

All system components are ideally suited to one another.

Selected components of the **VACUETTE®** system:

1 Sterile **VACUETTE®** Tube made from PET

Choose from:

- Tube Holder (various versions available)
- **VACUETTE®** Multiple Use Drawing Needle or VISIO PLUS Needle with flash chamber or Luer Adapter with Hypodermic Needle
- 4 Luer Adapter with SAFETY Blood Collection Set
- 5 **VACUETTE®** Safety Products

In addition:

- 6 Disposable Tourniquet
- 7 Sharps disposal container

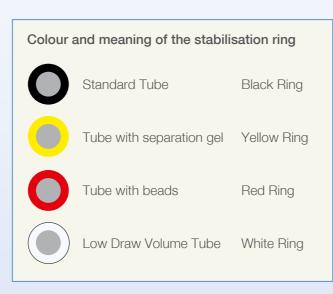

The **VACUETTE®** Product Range

The comprehensive product range consists of evacuated blood collection tubes for blood, saliva and urine collection, accessories, safety products for prevention of needlestick injuries, both manual and automated ESR systems (erythrocyte sedimentation rate), sharps disposal containers, transport containers and automatic instruments for decapping tubes.

The individual tubes contain additives for the stabilisation of samples. The caps of the tubes are coloured in accordance with the international recommended colour code, so that different tube types can be recognised at first glance. The different coloured rings on the top of the cap provide additional optical recognition.

More safety and efficiency with **VACUETTE®** closure systems

All tubes with 13mm diameter are available in two versions: with the PREMIUM Safety Twist Caps or with Non-Ridged pull caps. The **VACUETTE®** PREMIUM Tube with Safety Twist Cap is especially suited for manual opening, whilst the **VACUETTE®** Non-Ridged tubes with pull cap have been especially developed for use on automatic decapping instruments.

All tubes with 16mm diameter are only available with pull caps.

PREMIUM Tubes with Safety Twist Cap

Due to the optimal coordination between Safety Twist Cap and thread, the **VACUETTE®** PREMIUM tube can be opened with a simple twist movement, requiring minimal effort.

The secure grip on the tube prevents the cap from becoming unfastened by itself. This is a

The secure grip on the tube prevents the cap from becoming unfastened by itself. This is a particular advantage during transport.

Non-Ridged Tubes with pull cap

Without threads, the tubes are especially suitable for automatic decapping by a quick pull movement.

VACUETTE® Blood Collection Tubes

VACUETTE® Blood Collection Tubes

The innovative **VACUETTE®** Blood Collection Tubes made out of virtually unbreakable PET plastic have set the standard on today's market. They provide improved safety and hygiene during specimen collection procedures with the advantage of being as clear as glass.

Most **VACUETTE®** Blood Collection Tubes contain chemical additives, which in combination with the pre-determined vacuum guarantee the correct mixing ratio for the blood sample. Reliable results and simple application make **VACUETTE®** the primary vessel for all current analysis instruments. All the tubes have the CE-mark and most are US FDA cleared.

Coagulation sodium citrate / CTAD

Coagulation and CTAD tubes are used for examination of coagulation parameters. Coagulation tubes contain a buffered sodium citrate solution. It is available with a citrate concentration of 0.109 mol/l (3.2%) or 0.129 mol/l (3.8%). The mixing ratio is: 1 part citrate solution to 9 parts blood. In addition to buffered sodium citrate, CTAD tubes contain theophylline, adenosine and dipyridamol.

Tubes are packed 50 pcs per rack and 1200 pcs per carton

Serum

The inner wall of the serum tube is specially coated with microscopic silica particles, which activate the coagulation process. Serum separator tubes contain a separation gel in the base of the tube; during centrifugation, this gel forms a stable barrier between the serum and the blood cells.

Tubes are packed 50 pcs per rack and 1200 pcs per carton

Heparin

The inner wall of the tube is coated with spray-dried lithium, sodium, or ammonium heparin. These additives are anti-coagulants, which activate anti-thrombins, thus blocking the coagulation cascade of the blood specimen. LH Lithium Heparin Tubes are also available with a separator gel.

Tubes are packed 50 pcs per rack and 1200 pcs per carton

Discard Tubes

The **VACUETTE®** Discard Tube is not for analysis. The tube interior contains no additive. When using a (safety) blood collection set to draw a coagulation sample, a discard tube should be taken first. This will prime the line to reduce any deadspace and ensure that the coagulation tube will not be underfilled.

Tubes are packed 50 pcs per rack and 1200 pcs per carton

Homocysteine

Homocysteine occurs in cell metabolism as an intermediary product during the catabolisation of methionine. A higher concentration of homocysteine in the blood can increase the risk for cardio and cerebrovascular blockages. Determination of the homocysteine concentration in plasma is therefore carried out for primary prevention - and sometimes for secondary prevention - of heart attacks and strokes.

Tubes are packed 50 pcs per rack and 1200 pcs per carton

VACUETTE® Safety Products

In the healthcare sector sharps injuries account for most work-related transmissions of infectious diseases, whereby needlestick injuries present by far the greatest risk. More than 50% of all registered cases concern nursing staff, followed by doctors and laboratory staff.

However, needlestick injuries need not be an occupational risk. By using **VACUETTE®** Safety Products, this danger can be virtually eliminated. Furthermore, by working with **VACUETTE®** Safety products you are compliant with criteria given in the EU Directive (EU 2010/32).

VACUETTE® QUICKSHIELD

The **VACUETTE®** QUICKSHIELD Safety Tube Holder with 360° rotating safety shield is easy to use. The rotating safety shield ensures great flexibility and clear visibility of the entire puncture site. The safety shield is activated by using a stable surface or alternatively with the thumb.

VACUETTE® TUBE-TOUCH

Comfort and safety are the distinguishing features of the new **VACUETTE®** TUBE-TOUCH. The protection shield is activated automatically when the tube is inserted into the holder. After activation, the shield is still free to move, and encloses the needle as it is withdrawn from the vein due to the spring mechanism.

VACUETTE® Blood Collection Accessories / Medical Devices

VACUETTE® Blood Collection Accessories / Medical Devices

Simple handling and safety are of the highest importance during daily routine procedures. The requirements of the user are therefore the prime consideration during development of **VACUETTE®** Blood Collection Accessories. This led to development of products like the HOLDEX® Single-Use Holder, which was designed especially for patients with difficult vein conditions. The Luer nozzle of the HOLDEX® Single-Use Holder, positioned off-centre, guarantees the optimal angle for venipuncture.

Another product is the **VACUETTE®** Multiple Use Drawing Needle. The smoothly ground tip and design ensure gentle penetration of the patient's vein. More details on **VACUETTE®** Blood Collection Accessories can be found on the following pages.

Tube Holders

Tube Holders should be used exclusively with **VACUETTE®** Multiple Use Drawing Needles or **VACUETTE®** VISIO PLUS Needles, as both components are designed for optimal compatibility with one another. The use of these products with needles from other manufacturers is the responsibility of the user.

Blood Collection Needles

Blood Collection Needles are predominantly used in routine blood collection and are exclusively single-use. The colour of the needle protective cap simplifies visual recognition of the individual needle gauges. Yellow symbolises the needle dimension 20 G (0.90 mm), green 21 G (0.80 mm) and black 22 G (0.70 mm). Blood Collection Needles are supplied in two lengths: 1" and 1 1/2" (25 mm and 38 mm).

MiniCollect® Capillary Blood Collection System

The **MiniCollect**® product line is a functional capillary blood collection system, which has been especially developed for patients with difficult veins, children and neonates. Our innovative design guarantees high functionality and flexibility during use.

The unique construction of the closure cap makes it possible for the user to collect a blood sample from the **MiniCollect**® tube, without opening it, thus saving time and ensuring increased safety.

Capillary Blood Collection System (Tubes)

MiniCollect® Tubes are suitable for collection, transport and processing of capillary blood (collected by lancet stick) from for example infants, toddlers, children, geriatric patients and patients in intensive care. The tubes are available for different areas of application with a choice of fill volumes. Sample volumes range from 0.25 to 1ml.

Capillary Blood Collection System (Accessories)

The blood collection capillary and funnel are used for simplifying blood transfer from the puncture site to the **MiniCollect®** tube. Due to the relatively small size of **MiniCollect®** tubes, a special carrier tube was designed. The carrier tubes ensure compatibility of the system with most common centrifuge and laboratory instruments. The **MiniCollect®** Safety Lancets ensure consistent puncture depth for straightforward safe sample collection.

VACUETTE® Automatic and Manual ESR Systems and Accessories

The safe and reliable ESR readers are distinguished by their simple handling. They are fully automated and can be used in the ward, the doctor's office or in a laboratory. The readers work using infrared-sensors, which in contrast to visual methods guarantee improved reproducibility of results.

The erythrocyte sedimentation rate (ESR) is measured in an enclosed system, ensuring that the user does not come into contact with patients' blood. All ESR-readers are equipped with "permanent access". This means that tubes can be inserted into the measuring channels randomly and at any time, since each tube is analysed independently.

Automatic ESR System and Accessories

Three different sized models of ESR instruments are offered. Readers with 100 channels are ideal for middle to large laboratories. The 20 and the 10 channel readers were designed for small laboratories or doctors' offices. All **VACU-ETTE®** ESR instruments operate in accordance with the Westergren method.

Manual ESR System and Accessories

Two versions of the **VACUETTE®** Manual ESR System are available. The open sedimentation system consists of an ESR Tube made of PET plastic, ESR Pipette with graduated adapter and ESR Rack with graduation. The closed system consists of an ESR rack with graduation and a special ESR plastic tube with either a 2.75 or 1.5 ml volume.

Item No.	Description	Pac Inner	kaging Outer
	ESR Pipette with graduated adapter		
727111	ESR Pipette with adapter, graduated, 200mm, for 454073	200 pcs.	800 pcs.

VACUETTE® Urine Collection System

Urine, like blood, is a potentially infectious sample material. The **VACUETTE®** Urine Collection System enables a closed, sterile urine collection that in turn will maintain the sample quality and guarantee the efficiency of the testing procedure. Tubes are available with or without preservatives.

The preservative helps stabilise the sample, which is important when the sample cannot be analysed within 2 hours of collection. Tubes can be ordered with either a round base or a conical base. Round-based tubes are used for chemical urine tests, whilst tubes with a conical base are used for microscopic examinations of urine sedimentation.

VACUETTE® Urine Tubes

VACUETTE® Urine Tubes are used as collection, transportation and/or analysis vessels. The **VACUETTE®** Urine Tubes are sterile, leak-proof and virtually unbreakable. They are available as round or conical based. Furthermore, they are offered with or without preservative. Tubes with preservative should be inverted 6-8 times following collection in order to achieve homogenous mixing. Tubes are packed 50 pcs per rack and 1200 pcs per carton

	Crainer Rio One Saliva Quantification Kit	57

Greiner Bio-One Saliva Collection and Quantification System

The easy collection method and permanent availability make saliva an interesting alternative to other specimen materials such as urine or blood. Saliva is particularly suitable, if samples are required quickly, efficiently and non-invasively. On the basis of a liquid saliva extraction solution, Greiner Bio-One has developed a collection and quantification system, that is suitable for a broad range of applications, ranging from therapeutic drug monitoring to hormone analytics to drug screening.

The system consists of various components: A saliva extraction solution for the collection, a collection beaker, two evacuated tubes for the laboratory tests and the Saliva Quantification Kit for photometric determination of saliva calibrators.

Greiner Bio-One Saliva Collection System - Self-testing

Self-testing means that the test person can do the saliva collection his/herself without the assistance of any medical personnel. The system as well as the corresponding instructions for use is tested and certified for self-testing.

GENSPEED® Test System

GENSPEED® Test System

GENSPEED® enables the rapid identification of specific microorganisms or genes. We have developed this new product line to create a product solution to support you in your daily diagnostic challenges.

The revolutionary **GENSPEED®** MRSA Test from Greiner Bio-One is an *in vitro* diagnostic tool for qualitative detection of methicillin resistant *Staphylococcus aureus* (MRSA) in human nasal and pharyngeal smears and from culture. This bacterium is recognized worldwide as the most significant cause of nosocomial infections.

With the **GENSPEED®** C.Diff OneStep Test, toxigenic *C. difficile* can be rapidly identified by detecting genes for glutamate dehydrogenase (GDH), toxin A, toxin B and binary toxin in one step in less than 90 minutes.

For use with GENSPEED® Reader (manual version)	61
	61
For use with GENSPEED ® Reader (manual version)	61

GENSPEED® Test System

The **GENSPEED**® Test System was developed as a time and cost saving rapid test for low throughput applications in hospitals and laboratories.

The **GENSPEED®** Test System in general scores points for speed and high sensitivity. Three controls on the test chip offer great reliability.

Item No.	Description Analyzers	Packa Inner	ging Outer
453227	GENSPEED® Starter Package R2 (GENSPEED® R2, PCR-Cycler, Notebook, Accessories)	1 pc.	1 pc.

453206	GENSPEED® Starter Package (GENSPEED® Reader, PCR-Cycler, Notebook, Accessories)	1 pc.	1 pc.

GENSPEED® MRSA

For rapid detection of MRSA, the **GENSPEED®** MRSA Test running on the **GENSPEED®** Test System was developed.

It is a DNA-based in-vitro diagnostic tool for qualitative detection of MRSA within 75 minutes from human nasal and pharyngeal smears and from culture, targeting both resistance genes *mec*A and *mec*C.

Item No.	o. Description Packagii		aging Outer

Labelling of **VACUETTE®** Products

The table below provides a selection of the symbols used on our labelling, with an explanation in line with ÖNORM EN 980:2008.

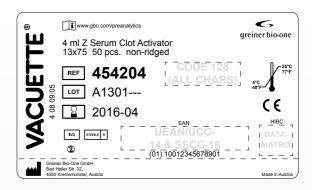

Symbol	Description
2	Symbol for "Do Not Reuse"
	Symbol for "Use By"
LOT	Symbol for "Batch Code"
REF	Symbol for "Catalogue Number"
M	Symbol for "Date of Manufacture"
***	Symbol for "Manufacturer"
STERILE EO	Symbol for "Sterilized Using Ethylene Oxide"
STERILE R	Symbol for "Sterilized Using Irradiation"
(€	CE Mark
IVD	Symbol for "In Vitro Diagnostic Medical Device"
ů 1	Symbol for "Consult Instructions for Use"
X	Symbol for "Temperature Limitation"
EC REP	Symbol for "Authorised Representative in the European Community"
PHT DEHP	Symbol for "Contains Phthalates"
LATEX	Symbol for "Contains or Presence of Natural Rubber Latex"

Letter code	Additive
Z	None / Clot Activator
LH	Lithium Heparin
NH	Sodium Heparin
АН	Ammonium Heparin
K2E	EDTA Dipotassium Salt
K3E	EDTA Tripotassium Salt
9NC	Coagulation Trisodium Citrate 9:1
4NC	Coagulation Trisodium Citrate 4:1
FX	Sodium Fluoride / Potassium Oxalate
FE	Sodium Fluoride / EDTA
FH	Sodium Fluoride / Heparin

Products with Highest Demands in Quality

Quality Standards

Product quality is of highest priority for Greiner Bio-One and to be sure of this, a thorough and multi-level quality management system has been developed.

Highly qualified and well-trained employees put the quality standards into practice. High-tech production technology as well as first-rate control and inspection devices ensure the highest quality standards.

Greiner Bio-One is certified according to ISO 9001:2008 and EN ISO 13485:2003+AC:2009.

The products also bear the CE mark.

Furthermore, every item that is distributed in the United States is cleared by the F.D.A., the U.S. Food and Drug Administration.

Quality Control

Quality controls and inspections are carried out by the quality control department as well as production personnel in the form of in-process checks. To ensure that these checks are carried out professionally, staff are trained regularly. The process consists of several steps:

- Incoming goods inspections
- In-process production controls
- Laboratory testing
- Sterility controls
- Final product inspections
- Final inspection prior to dispatch

Sterilisation

Sterilisation is carried out according to the latest standard of technology. Accelerated electron rays permeate the packaged products, killing off microorganisms completely. Sterilisation by electron rays is a validated and certified procedure. The process is extremely reliable, does not affect the product and does not leave any residue. To certify that a product has been through the sterilisation process, a red indicator is positioned on the label of the outer carton.

Production Locations

One of Greiner Bio-One's core competences is innovation. Over the course of the years, the company has become established as leader for knowledge and expertise, consistently building on this reputation. The production techniques are constantly subject to optimisation in cooperation with qualified partner companies, ensuring that Greiner Bio-One remains worldwide technology leader in this segment. Greiner Bio-One products are manufactured at high-tech production facilities to the highest quality standards in six locations on four continents, providing short delivery times all over the world.

The headquarters of Greiner Bio-One International AG are in Kremsmünster, Austria, where **VACUETTE®** blood collection tubes, urine tubes and accessories for specimen collection are manufactured.

Greiner Bio-One North America Inc.

In order to supply the North American market directly, a production location was built in Monroe, North Carolina. Here, more than 250 highly trained employees manufacture **VACUETTE®** products to the usual exceptional standard.

Greiner Bio-One Brazil

For distribution on the South American market, a production facility was built in Americana, Brazil, in 2004, for the manufacture of **VACUETTE®** blood collection tubes.

Greiner Bio-One Kft, Hungary

The fourth production facility is located in Moson-magyarovar, Hungary. Accessories for blood and urine collection are manufactured here.

Greiner Bio-One Thailand Ltd.

Since October 2008 Asia is supplied from our new production location in Amata Nakorn, Thailand.

Greiner Bio-One GmbH, Rainbach

In spring 2009, an extremely modern production facility with a cleanroom for **VACUETTE®** safety products was opened in Rainbach, Austria.

At Your Doorstep, Across The World

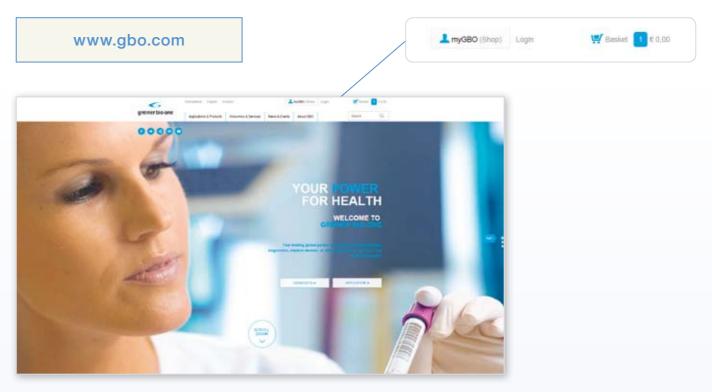

Our customers' wishes are the at the core of our actions. With our broad product range and multitude of application areas, our focus is on market requirements when developing innovative products and competent services.

With more than 1700 employees at seven production locations on four continents, as well as 24 subsidiaries in addition to our international distribution partners, we are represented directly in more than 100 countries. We have specialists working in sales, who have comprehensive expert competence. This ensures on-site customer care, quick deliveries and uncomplicated service. Furthermore, an online shop, a technical hotline as well as an FAQ databank are available to our customers so that product-related questions can be answered quickly and competently.

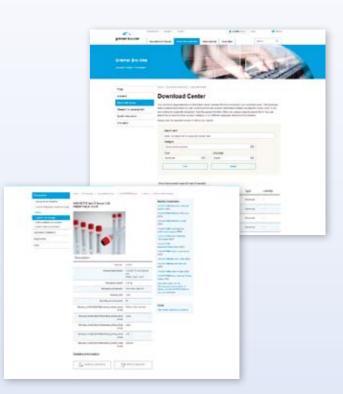

Greiner Bio-One Web Portal

You can find additional information on all Greiner Bio-One product groups online. The new GBO portal combines website and webshop in one application, which has the advantage of everything being available at one address:

Our new Website offers the following advantages:

- The download menu is now divided into product groups, with downloads of flyers, brochures, etc. available in a range of languages.
- FAQs for the various products are answered in the "Frequently asked questions" section.
- The latest developments are shown in brief and with an eye-catching layout in the Marketing Highlights.

Greiner Bio-One E-Learning

The long-term goal of our new e-learning platform **GBO** *Compass* is to provide the users of the **VACUETTE®** products special knowledge for correct usage.

Entry is via the address:

https://compass.gbo.com

To get started you need a password, which you can request from us. For easy and uncomplicated registration, please contact:

compass@gbo.com

With **GBO** *Compass*, we appeal to all people who work mainly in specimen collection. The multimedia educational content is available 24/7, regardless of time and location.

The purpose is to avoid pre-analytical errors, increasing the quality of samples, and thus to achieve process optimization. Ultimately, this should lead to time and cost savings in daily routine work.

Only an optimal use of our products, together with the necessary expertise can guarantee a long-term customer satisfaction.

Education and Training Material

To support our customers, we have a broad range of education and training material for sample collection with **VACUETTE®** products.

In times when public awareness of ecological issues is on the increase regarding, for example, greenhouse gases and global warming, the company's social-political responsibility also increases. As a medical technology company that manufactures plastics, Greiner Bio-One has risen to this challenge, and in the course of the comprehensive ecology project "The Green Spirit", has directed all company processes towards this aim. The manufacturing of Greiner Bio-One products takes place in consideration of ecological aspects. We ensure that we use energy saving production and sterilization technologies.

Production machines are powered by clean, renewable sources of energy. Fossil fuels like gas or oil are not used on our machines. On average, the machines need about 50% less energy. Due to the special recycling construction, the machines function on a material saving basis. A state-of-the-art heat recovery system utilizes the waste heat generated by the production machines to heat the entire building complex and help save additional energy.

VACUETTE® line products are delivered in non-bleached outer cartons. The cartons consist of 100% recycled material. Our **VACUETTE®** specimen collection tubes are provided in plastic racks of 50 pieces each. These racks are manufactured from polysterene sheets, which is recycled material too.

As is the case with most plastic materials, tubes made of PET also permit the recovery of either materials or energy. Based on generally ecological considerations, the recovery of materials is preferable. Unfortunately, this is not possible in the case of special medical wastes. Medical wastes contaminated with blood must be disposed of in suitable incineration plants. There, the **VACUETTE®** tubes are broken down into their natural constituents, of, carbon, hydrogen, and oxygen. Thermal recycling allows the energy generated in this process to be put to good use. The calorific value of one kilogram of plastic material is approximately equivalent of that of one litre of heating fuel. Provided that the incineration takes place in modern facilities, no significant pollution of the air is to be expected.

For more information please have a look at our brochure "The Green Spirit" - Environment protection and careful resource planning under www.gbo.com.

724300	Urine Beaker with Safety Stopper, 100ml, sterile	Urine Collection System	53
724310	Urine Beaker with integrated Transfer Device, 100ml, sterile	Urine Collection System	53
724315	24 Hour Urine Collection Container, 2.7 litre, brown	Urine Collection System	53
724316	VACUETTE® URI-PLUS 24h urine container with integrated transfer device	Urine Collection System	53
724320	Urine Beaker, yellow lid, with Ring Screw Closure, 100ml, sterile	Urine Collection System	53
727111	ESR Pipette with adapter graduated, 200mm, for 454073	Manual ESR System	49
729070	4NC ESR sodium citrate, PP, 2.75ml, black, 9x120, closed system	Blood Collection Tubes	22/49

Product Index

Item No.	Description	Chapter	Page
729073	4NC ESR sodium citrate, PP, 1.5ml, black, 9x120, closed system	Blood Collection Tubes	22/49
800101	Foam Insert for VACUETTE® Transport Container (VTC) for 12 Tubes	Accessories/Medical Devices	40
800105	VACUETTE® Transport Container (VTC) incl. Foam Inserts for 12 Tubes, incl. HK0259	Accessories/Medical Devices	40
800110	VACUETTE® Transport Container (VTC) incl. Foam Inserts for 12 Tubes, incl. HK0259	Accessories/Medical Devices	40
836072	ESR Rack without graduation for 454073	Manual ESR System	49
836075	ESR Rack with graduation for 729090	Manual ESR System	49
836077	ESR Rack with graduation for 729093	Manual ESR System	49
836283	Barcode scanner, for SRS 100/II and SRS 20/II	Automatic ESR System	48
836577	VACUETTE® MultiMixer for VACUETTE® Tubes	Automatic ESR System	48
836578	Rack for VACUETTE® 40-Pos. MultiMixer for 9mm VACUETTE® Tubes	Automatic ESR System	48
836579	Rack for VACUETTE® 40-Pos. MultiMixer for 13mm VACUETTE® Tubes	Automatic ESR System	48
836580	Sed Rate Screener 100/II (SRS 100/II) w. integrated printer (for 100 tubes)	Automatic ESR System	48
836582	Thermal printer, for SRT 10/II, SRS 20/II and SRS 100/II	Automatic ESR System	48
836585	Thermal paper roll for printer (836582) and integrated printers in 836580 & 836587	Automatic ESR System	48
836587	Sed Rate Screener 20/II (SRS 20/II) w. integrated printer (for 20 tubes)	Automatic ESR System	48
836588	Control Unit for SRS 100/II, SRS 20/II and SRT 10/II	Automatic ESR System	48
836592	Sed Rate Timer 10/II (SRT 10/II) (for 10 tubes)	Automatic ESR System	48
840050	VACUETTE® Tourniquet, latex free	Accessories/Medical Devices	37
840051	VACUETTE® Tourniquet for children, latex free	Accessories/Medical Devices	25/37
840053	VACUETTE® Disposable Tourniquet, latex free	Accessories/Medical Devices	25/37
840056	VACUETTE® Super-T Disposable Tourniquet, latex free	Accessories/Medical Devices	37
855900	VACUETTE® UNICAP Decapper for Roche / Hitachi Racks	Accessories/Medical Devices	39
855901	VACUETTE® UNICAP Decapper for Tecan Racks	Accessories/Medical Devices	39
855902	VACUETTE® UNICAP Decapper for Bayer Advia Racks	Accessories/Medical Devices	39
855903	VACUETTE® UNICAP Decapper for Olympus Racks	Accessories/Medical Devices	39
855904	VACUETTE® UNICAP Belt Decapper (with belt adapter for insertion of tubes)	Accessories/Medical Devices	39
855905	VACUETTE® UNICAP Decapper for Sysmex / Iris / Menarini	Accessories/Medical Devices	39
855907	VACUETTE® UNICAP Belt Adapter 100mm	Accessories/Medical Devices	39
855908	VACUETTE® UNICAP Belt Adapter 75mm	Accessories/Medical Devices	39
881010	GBO Saliva Quantification Kit	Saliva Collection System	57
881001	GBO Saliva Collection System, single packed	Saliva Collection System	56
881012	GBO Saliva Collection System, 50 pcs. bulk	Saliva Collection System	56
881111	GBO Rinsing Solution 6ml	Saliva Collection System	56
881112	GBO Saliva Extraction Solution 4ml	Saliva Collection System	56
881115	GBO Saliva Transfer Tube (4) 3.5ml	Saliva Collection System	56
881116	GBO Saliva Transfer Tube (5) 3.5ml	Saliva Collection System	56
881211	GBO Saliva Collection Beaker, with integrated transfer device	Saliva Collection System	56
HE4723	Label "UN 3373"	Accessories/Medical Devices	41
HK0190	Transport carton for 1pc. VACUETTE® Transport Box (VTB)	Accessories/Medical Devices	40
HK0259	Transport carton for 1pc. VACUETTE® Transport Container (VTC)	Accessories/Medical Devices	40
